Skills

- Python, JavaScript, TypeScript, Java, Vue, Delphi (XE5, Tokyo), React, Angular, React Native
- SQL, DB (Firebase, MySQL, PostgreSQL, Redis, SQLite)
- Docker, WebSockets, REST API, AWS Cloud, Microservices, CI/CD, Unit Test, E2E Test
- Linux, Windows, Mac OS
- Communication, Problem-solving, Team work, Proactive

Experience

Full Stack Developer - FoodInn Ireland   *Ireland* **10/2022 - Current**

- I eliminated repetitive API requests, improved system performance and user experience by implementing Web Socket technology.
- I drove an increase in customer adoption which resulted in substantial monthly revenue growth for the company by developing a system from scratch for order and delivery management.
- Stacks: Vue3, Typescript, Python3, PostgresSQL, CI/CD GitHub Actions, AWS Cloud, Web Socket, Rest API and Docker.

Full Stack Developer - Infinities *Part Time*   *Australia* **06/2023 - Current**

- I empowered Infinities, leveraging impactful augmented reality and map-based localization solutions, amplifying user engagement and fueling the company's growth.

Full Stack Developer - PRODEMGE   *Brazil* **07/2021 - 10/2022**

- I enhanced system performance, efficiency and interface, resulting in increased customer satisfaction. This was achieved by migrating a legacy Java system to a modern architecture using Vue3, Typescript, Containers, and automated deployment.
- I provided greater user satisfaction and contributed to the overall success of the product through my effective communication between clients and the UI/UX designer.
- Stacks: Vue3, Typescript, Python3, Java 17, PostgresSQL, Oracle, DB2, CI/CD GitHub Actions, AWS Cloud, Web Socket, Rest API, Jenkins and Docker.

Full Stack Developer - Slinger Web *Free lancer*   *Brazil* **03/2022 - 07/2022**

- I led and developed a new project responsible for handling international freight, in this project I acted as architect and developer.
- In this project I was responsible for passing on knowledge to other developers about technologies such as Vue3, Typescript, Docker and Testing, which greatly strengthened my communication and teamwork.
- Stacks: Front: Vue3 + Typescript Backend: Python, PostgresSQL database, Docker, AWS Cloud, CI/CD with Github actions.

Full Stack Developer - ATS Informática   *Brazil* **06/2019 - 07/2021**

- Together with my team, we were able to provide a more user-friendly interface and also a more pleasant working environment for developers through the migration of a system in Delphi XE5 to Delphi Tokyo (a more updated version).
- I contributed to improving system performance, increasing scalability and customer satisfaction by migrating from a legacy Delphi system to a more modern architecture: Vue3, Typescript, Node, PostgreSQL, Docker, CI/CD, Jenkins and Github Actions.
- I was responsible for training and mentoring interns, it was a mutually beneficial experience that enriched my professional growth and had a positive impact on the development of aspiring talents within the organisation.

Technical Support - Oscom Automação   *Brazil* **01/2019 - 06/2019**

- I increased the company's monthly invoicing, creating an inventory control system.

Education

- **Bachelor of Computer Science,** Salgado de Oliveira University *Brazil, MG, BH* **01/2018 - 12/2022**

More about me

- I love to study and increase my knowledge
- I like to read, these are some books I've read: Clean Code, Don't make me think, Clean architecture, 12 rules for life, How to make friends and influence people
